Graphic Arts: Image Extractor pulls raster images from EPS

MacWeek, April 27, 1998

The \$40 utility reads native Adobe Illustrator, Illustrator EPS, Macromedia Freehand and QuarkXPress EPS files and lists any embedded EPS or raster images. Users can then choose to extract raster images one at a time.

Image Extractor requires AppleScript Version 1.1 or later and 8 Mbytes of RAM, the company said.

Buddy Co. of Effingham, Ill., can be reached at (217) 342-6808; buddy@effingham.net; <http://www.effingham.net/buddyco>.
